Education

University of Toronto **2022 - 2026**
Bachelor of Science in Computer Science

- **Relevant Courses:** Data Structures and Algorithms, System Design, Databases, Operating Systems

Experience

Squarepoint Capital Winter 2027
Software Engineer Montreal, QC

- Incoming Software Engineer - Real-time Trading Systems.

Pinterest Sep 2026 – Present
Software Engineer - Cloud Architecture Toronto, ON

- Engineered infrastructure supporting Pinterest's migration from **Teletraan EC2 to PinCompute (Amazon EKS)**, addressing **IPv4 address exhaustion** through a large-scale transition to **IPv6**.
- Built **static-analysis linting tooling** to detect IPv4 literals and application-level incompatibilities across production services prior to IPv6 migration.
- Developed **network connectivity validation tooling** for Amazon EKS environments to verify cluster and service readiness for core IPv6 networking operations.
- Integrated validation and remediation workflows into **CI/CD pipelines across 765+ repositories**, combining static-analysis findings with **LLM-generated code changes** to automatically open developer-ready pull requests.

Royal Bank of Canada Jan 2026 – Aug 2026
Software Engineer Toronto, ON

- Built and maintained **Java Spring Boot microservices** for a U.S. corporate payments platform serving Fortune 1000 clients and processing **1M+ payment instructions** for RBC Capital Markets.
- Reduced end-to-end payment preprocessing latency by **55%** through **parallelized Camunda workflows**.
- Improved payment transaction retrieval performance by **30%** using **Elasticsearch**, leveraging inverted indexing.
- Implemented a **Kafka-based event streaming layer** across distributed payment workers with **99.9% delivery reliability**, centralized event state, and full audit logging.
- Deployed containerized microservices to **Azure Kubernetes Service (AKS)** and diagnosed production issues using **Splunk** and **Dynatrace**.

Appy.yo May 2025 – Aug 2025
Software Engineer Toronto, ON

- Developed full-stack features for an AI-powered physiotherapy platform using **Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, Nginx, and AWS EC2**.
- Built REST APIs and an **LLM-based physiotherapist chatbot**, implementing authentication and caching optimizations that reduced response latency from **10+ seconds to under 300 ms**.

Projects

Hybrid Stock & Crypto Exchange | *Spring Boot, Next.js, React, PostgreSQL, Redis*

- Built a full-stack trading platform integrating **Polygon.io** and **Coinbase Exchange APIs** for real-time stock and cryptocurrency market data, supporting **1000+ users**.
- Reduced external API calls by **50%** using **Redis TTL caching** while maintaining transactional safety with **PostgreSQL** under concurrent order execution.

Technical Skills

Languages: Python, Java, C/C++, HTML, CSS, JavaScript, TypeScript, SQL, Go
Backend & Systems: Spring Boot, Node.js, REST APIs, Kafka, Redis, PostgreSQL, MongoDB, Microservices, Distributed Systems, Kubernetes, Docker
Cloud & Infrastructure: AWS, Azure, GCP, Amazon EKS (Elastic Kubernetes Service), ECR, Azure Kubernetes Service (AKS), CI/CD, IPv4/IPv6 Networking, TCP
Tools: Git, Elasticsearch, Splunk, Dynatrace, Camunda, Swagger/OpenAPI, Buildkite
